

CORMETECH

Laboratory Engineering Technician

\$500 Signing Bonus!

SUMMARY OF POSITION

The Laboratory Technician performs repairs and preventive maintenance for laboratory equipment including Pilot, Bench and Micro Reactor systems. The position establishes and maintains a thorough preventative maintenance program for each of the lab systems and calibration

WHAT YOU WILL BE DOING

- Operate and maintain all reactor systems and peripheral equipment such as pumps, gas delivery systems, laboratory HVAC, and miscellaneous electronics and electrical equipment.
- Provide support for controls issues and programming of PLC and HMI systems.
- Accurately and timely troubleshoot and fix lab equipment problems.
- Work and collaborate with plant maintenance and engineering staff.
- Plan and coordinate additional maintenance support from in-plant maintenance or contractors.
- Solve minor problems and issues that arise during operation of the reactor.
- Establish and manage a strong preventative maintenance program for major systems.
- Manage laboratory calibration program, ensuring all calibrations are completed at the required frequency.
- Design and implement new reactor systems.
- Manage small capital projects.
- Recommend equipment improvements and operating procedures.
- Manage or participate in the execution of capital projects, including feasibility, design, preparation of AR's, project management and management of contract labor.
- Work collaboratively with other development and operating staff on operations, routing checks, problem solving, and improvements.
- Serve as a resource to the plant maintenance staff for non-laboratory issues.
- Assist with the design and implementation of new reactor systems

WHO WE ARE

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

BENEFITS OF OUR WORK

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.

A successful candidate must have:

- Associates degree in science or technology.
- 2-4 (5+) years of experience working as a lab technician.
- Mechanical and control systems skills.
- Ability to diagnose and repair equipment.
- Experience with PLC programming.
- Ability to communicate effectively both in writing and orally.
- Strong organizational skills and the ability to manage multiple priorities.
- Ability to plan and execute work efficiently and perform it accurately.
- Capability to work effectively independently as well as on a team.
- Strong problem-solving skills.
- Ability to work shift for short periods or occasional weekends.
- Innovative capabilities.
- Adaptability.
- Creative and innovative thinking.
- Strong collaboration skills.
- Proficient in Microsoft Office products.

THE GOODS

- ✓ Eligible for benefits on DAY ONE
- ✓ Multiple health plan options
- ✓ Vision and dental plans for you & your dependents
- ✓ 401(k) with Company Match
- ✓ Annual Goal Sharing Bonus
- ✓ Lucrative Paid Time Off
- ✓ Education Reimbursement
- ✓ Company paid Life Insurance
- ✓ Internal Promotion Opportunities
- ✓ Employee Assistance Program

Preferred qualifications:

- Bachelor's degree in engineering
- Programming experience with Honeywell UMC800 and HC900
- Prior experience repairing laboratory reactors, sample trains, pumps, meters, and electrical problems
- Knowledge in electronics and electrical repair
