

CORMETECH

Production Operator 3

\$500 Signing Bonus!

SUMMARY OF POSITION

This position involves using overhead cranes to move catalyst modules through the regeneration process while maintaining process specifications and recording process data. The production operator 3 will also encounter direct interaction with chemicals in an industrial atmosphere. This position will require learning the regeneration process as well as performing QA/QC checks, recording process information, and properly adding chemicals to tanks.

WHAT YOU WILL BE DOING

- Follow all safety procedures
- Overhead crane operation for moving modules through process
- Read and follow process instructions
- Maintain process specifications
- Ensure modules are moved at proper times
- Verify that solution criteria (temp, pH, etc.) is within specification before use
- Record appropriate process information on module traveler cards
- Properly label catalyst modules during and after processing
- Alert supervisor of process deviations
- Assist in chemical mixing and additions as needed
- Verify and document modules are washed properly
- Track and record project information, process data, and sampling plans
- Learn basic functions of control room, assist in control room operations as needed

WHO WE ARE

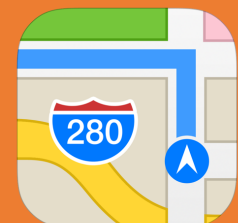

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

BENEFITS OF OUR WORK

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.
