

CORMETECH

Maintenance Technician-Day Shift

\$2000 Signing Bonus!

SUMMARY OF POSITION

Responsible for installation, maintenance, and repairs of equipment, facilities. Perform a variety of repairs, installations, and maintenance to support production and process equipment. Maintain facility equipment, building and utility systems including but not limited to steam, chillers, and water, air, and gas lines. Maintain a variety of electrical and electronic equipment. Inspect, diagnose issues, and perform preventative maintenance and repairs as required and needed.

WHAT YOU WILL BE DOING

- Perform daily maintenance support and repairs of all production and facility equipment and systems
- Replace pumps, motors and other parts as needed
- Perform scheduled preventative maintenance of all production and equipment and systems through use of the work order system
- Troubleshoot and repair mechanical, hydraulic, pneumatic, electrical, and electronic equipment, programmable controls, power supplies, drives, gages, and test equipment
- Install, diagnose, repair, and maintain a variety of production and building equipment
- Perform preventative maintenance inspections and preventative maintenance on all equipment per department checklists and/or manufacturers procedures and recommendations
- Work cooperatively with managers, engineers, supervisors, and operators to repair maintenance concerns in an efficient and thorough manner
- Travel safely to warehouse and other off-site locations to pick up spare parts, equipment, or other requested items
- Assist in building security including alarm operations and fire protection systems
- Provide spill response and other emergency assistance as needed
- Be available to respond to emergency situations outside of normal working hours
- Enter completed Work Orders in Somax (CMMS)

WHO WE ARE

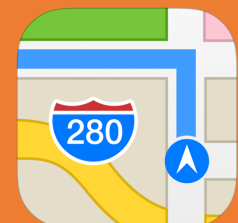

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

BENEFITS OF OUR WORK

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.
