

**CORMETECH**

## Maintenance Technician

**\$2000 Signing Bonus!**

### SUMMARY OF POSITION

The maintenance technician position is responsible for performing plant equipment maintenance, troubleshooting equipment, repairs including preventive maintenance and emergency calls, modification and upgrades to existing plant equipment. Maintenance is performed according to safety, predictive and productive maintenance systems, and processes to support the achievement of the site's business goals and objectives.

### WHAT YOU WILL BE DOING

- This position requires one to perform general and preventive maintenance for pumps, valves, PLC Controls, automation components, while following plant rules and sound safety practices.
- Provide emergency/unscheduled repairs to production equipment during regular work schedule and be available during afterhours and or weekends to make recommendations/repairs.
- Diagnose problems, replace and or repair equipment as required to maintain production.
- Assist engineering staff with install, startup, and implementation of new equipment and equipment upgrades

### WHO WE ARE

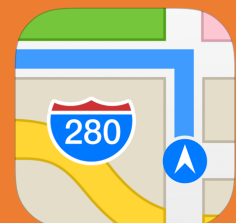

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

### BENEFITS OF OUR WORK

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.
