The Process Engineering Technician is responsible for manufacturing operations in the extrusion process areas. This includes making sure the area is meeting its goals for throughput, quality, and safety.

### **WHAT YOU WILL BE DOING**

- Ability to work 2<sup>nd</sup> shift with approximate schedule of 2:00 p.m. to 10:30 p.m.
- Continually optimize extrusion parameters to produce high quality levels in the most economical manner
- Troubleshoot and define machine tooling and material issues
- Hands on mechanical position, need ability to assemble hardware with bolts and shims
- Able to create and post run orders in Excel
- Able to summarize issues and communicate to the next shift
- Ensure preventative maintenance for the process is performed
- Train production associates in the area on best practices
- Assist Process Engineers with introduction of new products and processes.

### **WHO WE ARE**

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

### **BENEFITS OF OUR WORK**

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.
