

CORMETECH

QC Chemist

\$2000 Signing Bonus!

SUMMARY OF POSITION

This position's main task is to support all aspects of Production Lab analyses in a fast pace environment. This includes but is not limited to receiving and analyzing samples, prioritizing workload, and reporting values according to lab procedures. The QC Chemist must be able to use and maintain highly sensitive laboratory instrumentation including ICPs, XRF, IC and other equipment. The position requires the ability to be responsible for accurately and independently preparing solutions in accordance with written specifications based on commonly used units such as weight percent, volume percent, mole percent and normality.

WHAT YOU WILL BE DOING

- Follow all safety procedures and guidelines
- Maintain good housekeeping to avoid cross contamination and ensure a safe working environment
- Prepare and analyze samples with instruments and equipment including but not limited to ICP, XRF, IC
- Perform maintenance and troubleshooting of instruments and equipment including but not limited to ICP, XRF, IC
- Ensure accurate and precise measurements
- Read and follow procedures to maintain a consistent process within the team
- Record and organize sample results in necessary databases then generate and distribute report(s)
- Prepare technical reports to inform necessary departments
- Perform inventory control
- Replenish all supplies necessary and leave lab in good order to maximize job efficiency
- Communicate with supervision upon the arrival of issues or general abnormalities
- Prepare samples in accordance with written and verbal instructions using generally recognized good laboratory practices for maintenance of both quality and safety

WHO WE ARE

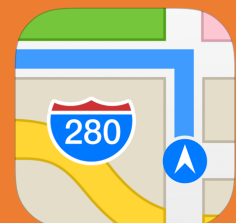

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

BENEFITS OF OUR WORK

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.
