

CORMETECH

Test Engineer - Scientist

\$2000 Signing Bonus!

SUMMARY OF POSITION:

The Test Engineer is responsible for ensuring product testing equipment is always functioning at top capacity through scheduled maintenance and repair. The position troubleshoots and identifies process and functional improvements in the lab. The Test Engineer is accountable for leading projects for improving testing equipment and processes. The Test Engineer works closely with production engineers, maintenance, and the lab team to determine ways to improve safety, design new reactor systems, and improve Lab processes.

WHAT YOU WILL BE DOING:

- Maintain all test instruments and laboratory equipment
- Coordinate all equipment maintenance and repairs
- Support investigations of questionable product performance to discern the root cause is a product or test process/equipment issue.
- Lead or support all process and equipment upgrades
- Provide engineering and process improvement support to all test reactors, and quality testing areas
- Identify and implement innovative improvements resulting in efficiency, reliability, and test quality improvements for testing operations
- Monitor all software performance in the Lab; work closely with IT to troubleshoot issues
- Follow all safety protocols

WHO WE ARE

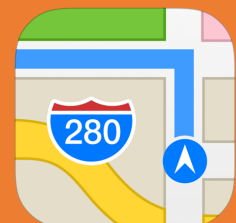

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

BENEFITS OF OUR WORK

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.
