# Senior Maintenance Manager

## \$2000 Signing Bonus!

### SUMMARY OF POSITION

The Senior Maintenance Manager is responsible for managing plant facilities, equipment, controls, and maintenance resources. The role maintains and improves process equipment and the overall facility.

### WHAT YOU WILL BE DOING

- Ensure maximum performance of all production operations and facility services
- Maintain and direct a comprehensive and effective preventative maintenance program
- Reduce equipment downtime
- Effectively and efficiently monitor work assignments, progress tracking, and accurate and timely reporting
- Design and manage equipment upgrade and new installations
- Support production, engineering, and development by attending and participating in meetings
- Ensure safe work environment for all employees
- Ensure maintenance employees are trained and working in a safe manner
- Identify areas requiring improvement related to maintenance processes, equipment, and facility services
- Work on plant equipment to improve electronic controls and PLC programming
- Provide updates to mechanical, wiring and ladder logic drawings and documentation packages as changes and upgrades are introduced
- Install, program, and repair robots and related equipment, such as programmable controllers, end-of-arm tools, and conveyors
- Suggest methods to improve workflow and increase production.
- Assure technical and safety compliance
- Troubleshoot to determine the root cause of equipment and process problems
- Train, mentor, and coach the Maintenance Supervisor

### WHO WE ARE

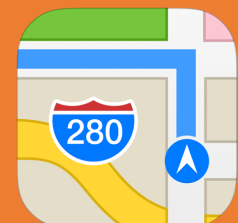

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

### BENEFITS OF OUR WORK

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.
