

CORMETECH

Controls Engineer

\$2000 Signing Bonus!

SUMMARY OF POSITION

The Controls Engineer is responsible for developing and maintaining PLC programs, robotics programs, and controller configurations throughout the plant. Leads projects to upgrade existing control systems and implement new control systems, including making recommendations for safety, continuous improvements, risk avoidance and leading troubleshooting activities when problems occur. The position will also manage (1) one Controls Technician as well as ongoing training and mentoring of Maintenance Technicians supporting the Maintenance Manager. In addition, the Controls Engineer will also be asked to define, plan, and execute other maintenance related projects as required.

WHAT YOU WILL BE DOING

- Work on existing and new plant equipment with focus on electronic controls and PLC programming
- Provide updates to Mechanical, Wiring and Ladder Logic Drawings and Documentation packages as changes and upgrades are introduced.
- Install, program, and repair robots (Fanuc) and related equipment, such as programmable controllers, end-of-arm tools, and conveyors.
- Suggest methods to improve workflow and increase production.
- Ensure technical and safety compliance.
- Troubleshoot using tools, experience, and knowledge to determine the root cause of equipment and process problems.
- Repair on electric power devices, tools, lights and fuses up to 480vac
- Upgrade equipment and control systems including mechanical, pneumatic, hydraulic, or electrical upgrades including the
- Install and program PLCs with operator interfaces.
- Manage other maintenance related project work
- Ensure all preventative maintenance is performed in a timely manner
- Coach and develop Maintenance Technicians on electrical/controls

WHO WE ARE

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

BENEFITS OF OUR WORK

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.

CORMETECH

A successful candidate must have:

- Bachelor's degree in electrical engineering, or equivalent
- 5 years work experience in a maintenance capacity
- Valid driver's license with an acceptable driving record
- Ability to safely operate a motor vehicle
- Working knowledge of PLC programming
- Proficient in Microsoft Office MS Word, Excel, and Power Point
- Ability to work with all plant departments including development, lab, quality, and EHS as well provide support to other Cormetech facilities if needed
- Good oral and written communication skills
- Demonstrated personal responsibility and dependability
- Ability to coach and provide useful feedback

THE GOODS

- ✓ Eligible for benefits on DAY ONE
- ✓ Multiple health plan options
- ✓ Vision and dental plans for you & your dependents
- ✓ 401(k) with Company Match
- ✓ Annual Goal Sharing Bonus
- ✓ Lucrative Paid Time Off
- ✓ Education Reimbursement
- ✓ Company paid Life Insurance
- ✓ Internal Promotion Opportunities
- ✓ Employee Assistance Program

Preferred qualifications:

- Work experience in a manufacturing environment
- Robotics experience preferred
- PLC programming, Allen Bradley (Kinetics 5500 Servo, Powerflex drives, PanelView HMI's),
- Modicon, Honeywell UMC800 preferred
